DETAILED ACTION

Applicants' arguments, filed 6/17/04, have been fully considered but they are not deemed to be fully persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

NEW MATTER

Claim 40 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

It is acknowledged that claim 40 has been copied for interference purposes. The nucleotide segments cited, however, specifically in parts a) – d) have not been found as filed and thus constitute NEW MATTER regarding this application. This rejection is necessitated by amendment.

Claims 1-4, 7-33, 36-39 are allowed.

POTENTIAL INTERFERENCE

The request for interference included in the REMARKS, filed 6/17/04, is being evaluated.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1631
